Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Two main gears collapsed, left wing struck pavement

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At around 1445 received ATIS information from PHJR Airport. Afterward I did the run-up procedures to check a/c systems. Everything operated normal. I requested taxi clearance from PHJR ground controller, taxied to approach end of runway 4L. I requested take off clearance from PHJR tower. I also requested to stay in the pattern. I took off from runway 4L. I flew left pattern. I lined up with runway 4L centerline on final. I flew the a/c on centerline until touchdown. I touched down on two main wheels softly. I moved the stick forward to keep the main wheels on the runway. The a/c yawed to the left. I corrected with right paddle. A/C then yawed to the right. I attempted to correct it with left paddle, but the aircraft kept yawing to the right. I applied brakes and skidded down the runway. At this time the main landing gear collapsed. A/C slid on the runway on its belly until it came to rest about 5-10 ft from centerline of runway 4L.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I think there might be a slight quarter left tailwind on touchdown. It would be safer to fly with a headwind situation.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No*(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)*

The left tailwheel connector cable was not connected after the incident. The cable was connected during preflight inspection.
