NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 1550 on Friday, January 13, 2017 I landed on runway 34 at Agro-West airport, 5CA7 in N795DE. The landing runway is 30 feet wide and 3000 feet long. The weather was clear and light winds. The 3 passengers onboard got off and I prepared to depart. About 10 minutes later, I lined up to depart to the south on runway 16. I pushed up the throttles part way for takeoff and released the brakes. I continued to advance the throttles during the roll as I accelerated. At approximately 70-80 knots I glanced at the engine instruments and noticed they were not at full power. I advanced the throttles a little further and the aircraft began going left of centerline. I tried to correct with right rudder but the left main mount departed the paved surface. Due to the recent heavy rains the soil adjacent to the runway had become heavy mud. I continued to try to correct with rudder to no avail. The entire aircraft departed the runway at about 80 knots and continued across the recently plowed and muddy field, which was full of furrows. The aircraft came to a stop. I gathered my wits went to the back of the aircraft, opened the entry door and exited the aircraft.
