Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Engine mount bent. Firewall bent at top. Prop strike. Prop blades bent. Top of vertical stabilizer and rudder crushed. Pilot side wing damaged. Pilot side strut bent. Sheared rivets on belly on aft end of fuselage.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flew from COE to Boundary County Airport (K65S). Landed at Boundary County. Took off from Boundary County and flew back to COE. Entered right downwind for runway 02 at traffic pattern altitude (3300 ft). Began normal descent for full-stop landing on runway 02. When abreast of threshold on downwind leg, reduced power to 1500 RPM, set flaps at 10°, and reduced airspeed to 75 ~~mph~~. Turned base, set flaps to 20° and reduced airspeed to 70 mph. Turned final at 500 feet AGL, set flaps to 30° and reduced airspeed to 65 mph. Continued descent to land. Airspeed dropped to touchdown speed of 60 mph. Aircraft began getting too low but pilot failed to notice and correct problem. Aircraft main gear hit snow about 15 yds from the beginning of the paved portion of the runway. ~~Off~~ the approach end of the runway was a level field which was covered in snow. The snow was piled about 3 feet deep from where the plows had deposited the snow from the runway at the place where the main gear hit the snow. When the main gear hit the snow, the aircraft slowed suddenly and flipped forward, first onto its nose and then onto its back. This occurred at about 2:30 pm local time. The pilot shut off fuel and magnets and master switch. The pilot and 2 passengers climbed out of the inverted plane and made phone calls to get help. No one was hurt or those aboard the aircraft. No damage was done to any person or property on the ground. The aircraft had come to rest upside down with its vertical stabilizer resting on the asphalt of the runway and the rest of it resting on the snow just off the edge of the runway.
