Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. weather - AWS - 118.275 Departed Nephi (UT 14) at approximately 3:30 MST to the west north west 45 miles to job site. After completing the job I then proceeded to turn east south east to return back to exit ^{UT 14}. I began to climb to a safe altitude when I realized the terrain ahead was going to be close to clear. I then tried to turn left to about my original flight path when I noticed my airspeed would not and terrain would not let me turn. Then I proceeded straight ahead adding small amounts of flaps at a time. At this time I knew it was going to be close to clearing or not clearing the mountain top. At the point of impact I was approximately 6-10 ft from clearing the mountain on west side. After impact plane then slid up and over into the East side of mountain coming to rest against trees and upright.		

RECOMMENDATION (How could this accident/incident have been prevented?)
