NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 11 am on 1/26/2017 I departed A20 for a routine flight to KREI. A few minutes after departure the radios went blank. I assumed a radio problem and since I was still in the pattern for a downwind departure from the airport I decided to just go back and land. When I put my gear down no lights came on, which was when I realized I had more than a radio problem. I applied power and flew a couple miles east of the airport and orbited while I tried to sort things out. I verified I had no power on anything. I cycled the master switch and the radio master a couple times with no results. I checked the circuit breakers and they were all fine. I couldn't figure out anything else to do to diagnose the electric so I turned my attention to landing.

I remembered the emergency gear extension procedure was to lower the gear switch, (it had never been retracted) slow to 85 knots and shake the tail. All of which I did. I also knew the plane was equipped with an automatic gear extension system if you were in a landing configuration and the gear wasn't down, so made sure the system override was not engaged, I put in 3 notches of flaps, and slowed the plane further hoping that would put the gear down if it was not already down.

At this point I returned the couple miles to the airport feeling somewhat confident that the gear was probably down and if not it would be before I landed. I told my wife, who was in the back seat, to tighten her seat belt and open the door. I proceeded to land holding it off as long as possible.

Upon landing the left main either collapsed or was never down. The Plane then slid along the runway exiting into the dirt on left side. Shortly thereafter the nose gear dropped into a small hole collapsing the nose gear. The plane then slid a short distance and stopped.
