Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose gears collapse, props hit, skin around nose gear

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed KCRW approximately 15:30 on January 28, 2017. Flew to HVQ then tracked to HNN then self-navigated to the KCRW ILS 23 approach. On approach to runway 23, winds were from 260 at 11 gusting to 17. Everything was normal on descent and on final approach there was a cross wind and I was planning to touch down on right wheel. When about 50' above runway, winds seemed to die down and approach was straight down the middle of the runway. At the moment I expected to touch down, I pulled power back, but I got lift for a moment (which I assume was wind gusting), plane rose about 10 feet, and then I lost the lift, and plane came down and bounced on runway, plane bounced about 10 feet, I gave it a little power but plane came down a second time on nose wheel, gear collapsed, prop hit runway and engine stopped. I was unable to steer and plane drifted about 30 feet into the grass median. I reported to tower and got out of plane to assess. Plane was on all three wheels and there were no apparent leaks, plane was stable and there was no apparent body damage other than gear collapse and skin around the front gear.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Refresh landing in wind gusts.
