Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Engine and motor mount torn off at 90% angle. All landing gear torn off. Empennage bent and damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 02/14/2017 I proceeded to KRTS, our home airport, for a day of solo flight training. I haven't flown since 12/30/2016, because of weather. The day was very nice, VFR conditions, 10SM visibility, clear skies, calm winds. The preflight was uneventful, with no abnormal findings. I proceeded to the run up area of 26. Run up was also uneventful, with no abnormal findings. I took off 26 and departed to the NW. I flew to the Sierra Valley area for some power on and power off stalls. I then completed a few ground reference maneuvers. I then decided to perform one touch and go at Nervino, O02. I entered the downwind on the 45, pattern altitude, pattern went by normally. I successfully landed, retracted flaps, throttled up, checked gauges and began my takeoff roll. The plane began drifting left and for some reason I did not correct properly. I attempted to use the yolk, unsuccessfully. I noted a snow bank on the South side of the runway. I fixated on the snow and proceeded to run into it. I'm not sure if I lost consciousness, my first memory is exiting the aircraft, under my own power, then returning to turn off magnetos and switches. I then awaited the arrival of emergency personnel.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Use right rudder to maintain runway centerline during takeoff. Do not fixate on any object, scan area.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
