DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☒ Substantial
☐ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage from the nose wheel caused the aircraft to go off of the runway. As the aircraft moved from the asphalt to the grass the nose wheel dug into the ground causing it to flip over. This caused damage to the nose cowling, propeller, spinner and top portions of the wing. As the tail came down the vertical stabilizer was damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The student was conducting his first solo flight at KRVS. The instructor conducted three (3) takeoffs and landing to a full stop prior to sending the student on the solo. On the first landing (08:20am) the student landed on the nose wheel of the aircraft causing the aircraft to bounce. The student recovered and conducted a go around. The nose wheel was suspected to have been damaged during the landing. On the next landing (08:27) the student was observed by the instructor to touch down softly on the main landing gear. As the nose wheel touch the runway the aircraft began to swerve to the right. The student was unable to keep the aircraft on the runway and entered the grass on the edge of the runway. As the nose wheel of the aircraft entered the grass it caused the aircraft to flip over. The aircraft came to a rest upside down and the student was able to evacuate the aircraft under his own power. The student was taken to the ER and received no injuries from the accident.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

Since the accident the school has focused on consistency with students prior to solo flights. If students do not demonstrate consistency they do not solo. The school has also implemented a higher standard for the stage check prior to the first solo. More focus is put into the traffic pattern to better prepare students for the first solo.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
