NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On March 5th 2017 I was on final approach to Henderson Executive airport in Henderson NV (KHND). I was cleared to land on runway 17R. The airplane was set in landing configuration and progressed to the runway as expected. Nearing touch down a violent wind gust without warning hit the airplane. I was recovering from the first gust when a second violent wind gust hit the airplane causing a wing to contact the ground. The aircraft was slammed to ground, stopping in ditch.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

At the time of the incident I do not feel the incident could have been prevented. Wind I encounter was extremely strong and much higher than reported or forecasted. The final 1/8 of a mile I encountered severe turbulence along with up and down drafts and what seemed to be wind shear. Conditions change so fast there was no time for a warning. The way all the elements converged there was nothing I could do and a victim of circumstances beyond anyones control. Perhaps a wind shear and/or turbulence detection system deployed on the field could have helpful.
