Date of Occurance : Feb 21, 2017

Aircraft : N614TA

Instructor : Vishal Saraswal

Student : Kazeem Oluwayor

We departed Ormond beach municipal airport (Korn), FL at 11:45 EST for a IFR Training flight cross country to Sanford international airport (KSFB), FL and back to Ormond beach municipal airport (Korn), FL.

About half way down the flight up, near Deland municipal airport (KDED), FL. I discovered that the throttle control was inoperative and that the RPM control had been fixed on the higher end. Upon recognition of the situation, I turned around to home base airport (Ormond beach municipal airport). I briefed my student on the situation and be prepared for it. About 7 NM out to the south west of Ormond beach municipal airport, I contacted the Ormond beach municipal airport's ATC and advised him about the throttle issue we were facing.

Upon receiving my clearance to land on runway 8 (active runway at the time), I executed a running landing and performed a go around the first time to reattempt. After advising the ATC about going around, I executed the running landing again (second attempt). At the second attempt to land, the helicopter skids made a hard contact with the surface followed by a complete stop on runway 8.

After securing the interior of the helicopter, I swiftly egressed the helicopter to check on the student and then grabbed the fire extinguisher further checking the helicopter for any fire hazard, but there was none.
