Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Ski, left landing gear, both left lift struts, left wing, prop, (maybe fuselage which will be determined by an A&P/IA when he comes)

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

. Narrative of occurrence. we always have a lot of snow at camp and the landing area is tracked with a snowmobile. On the quick return to camp & because of a grayer afternoon that diminished a good visual of the tracked snow I slid off the hard pack snow to the left at which moment the left sunk into the deep edge & that took my direction more to the left. I should have stopped right there but while still having momentum I pushed forward with a hard right control & powered up to try get back on the hard pack; I was not able to turn right but instead hit the snow covered tank with the left ski.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

in hind sight:

1. I should have marked the edges of the hard pack landing area made by snowmobile so that a gray light would not have limited a clear view.
2. I should have stopped when I had the chance instead of powering up to try get back on the hard pack.
3. I should taken the unused tank away from the landing last fall.
