Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller strike, spinner smashed, rudder bent, both wings bent, windscreen shattered, fuselage tubes bent, runway dented and fuel spills out both wing tank vents

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

April 3rd 2017, 1930 PDT I flew once around the pattern with my instructor Dave Aldred at SPB Scappoose Oregon. After a 3 point landing and full stop, He exited the plane. I proceeded to runway 15 to practice my landings and take offs. after 5 more landings with one go-around. My next landing on runway 15 was a standard 3 point landing with a proper approach speed and good touch down. I started my roll out. after what seemed to be a couple hundred feet the plane swerved to the left a bit then took a harder swerve to the right, as I tried to stay aligned with the runway with rudder inputs it felt as if I was going to go into a ground loop. As I continued to apply rudder input my foot must have hit the top of the pedal applying brake pressure enough to nose the plane over and traveling fast enough to flip the plane onto its back.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I believe if I had some thinner soled shoes on, I would have had a better feel of where my feet were contacting the petals.
