NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On March 03, 2017 at approximately 07:35 Matthew Perron was PIC of N264P, a Dehavilland DHC-2 Beaver on straight floats operated by Pacific Airways Inc.. He was departing on a scheduled flight from Ketchikan Harbor to Hollis and Thorne Bay Alaska. The Pilot had loaded his own aircraft with the assistance of the dock hand on duty prior to the flight. The winds were light and variable at the time of the departure with light rain 10 miles plus on the visibility, with a few clouds at 400ft and broken at 1700ft AGL. The pilot states that he taxied out a little farther than normal because of the aircraft departing in front of him and the fact that he was listening to the AWOS. He stated that after his normal run up checks he then applied full power. As the airplane was coming up onto step he collided with a channel marker buoy, it struck the RH wing tip. He reduced power and recovered from the impact. He then taxied back to the dock without further incident and unloaded his passengers and visually inspected the damage to the aircraft. No injuries occurred as a result of the incident.

RECOMMENDATION (How could this accident/incident have been prevented?)
