Narrative History of Flight:

Flight originated out of Nampa, ID (KMAN).

Two months ago Ryan and I discussed a sightseeing flight to the mountains near Mackay, Idaho. We pre-planned the course we wanted to fly and charted it out to be flown when the weather was acceptable. The last couple weekends we had the aircraft scheduled, but made a no-go decision based on the weather. On Thursday, the 23rd of March, the weather was trending favorable, so I scheduled the plane with AvCenter for a 25th March/Saturday flight. Saturday morning, after 9 hours of sleep, I woke up refreshed and checked the en route weather which was VFR/great. Closest weather reporting where we were headed was KSUN. KSUN reporting winds light and variable, overcast 14,000. I called Ryan and told him conditions were very good for the flight. Ryan picked me up and we talked about the route and weather conditions en route to the Nampa airport. At the airport, we rechecked all pertinent data for that route/flight. KSUN was then reporting clear. At 11:40 AM, I conducted a thorough preflight inspection and did a current weight and balance with the current fuel load. Start and taxi were uneventful. Start and taxi time were extended to 20 minutes which included run-up and waiting for 4 other aircraft for take-off. After departure, contacted Big Sky approach for transition and safety, then climbed to 7,500 east bound. Requested flight following and climbed to 7,500 then 9,500 crossing the mountains at Anderson Ranch Reservoir knowing they would lose us on radar. From this point on, we were VFR with AvCenter knowing destination area and return time. Further, I provided my father with tracking information. Proceeded along the road through the Fairfield valley, south of the mountains while rechecking the weather conditions at KSUN. Proceed around the mountains to the southeast to the Craters of the Moon area. We spent a little over an hour in flying around the Antelope Valley, Copper Basin, Mackay area. We were flying in the mountains. Winds were light, sky was clear, area weather was stable. At 1:45 PM, we discussed the need to head home soon and return the aircraft by 3 PM. We discussed an area we wanted to see again, then return home. During that west bound track, the north part of the valley we were at approximately 9500'. We turned left to cross the valley and make a right climbing turn southeast bound. After the left turn was initiated we encountered a down draft. I quickly added full power, full prop and 10 degrees of flaps and pitched for Vx, while simultaneously banking to the right trying to escape the downdraft and catch an updraft and/or follow the terrain lower. The downdraft intensified so I was trying to turn downstream but the downdraft was too intense. When I recognized we were unable to climb out of the downdraft I made the best decision I could to save my passenger and myself to make it survivable. I never stopped flying the airplane. We struck the top of the trees at approximately 2:05 PM and decelerated before striking the snow covered ground. Once stopped, I instructed Ryan to unbuckle and evacuate out the front missing windshield area and get away from the aircraft while I ensured the power was off, key removed. Fuel lever was jammed. I engaged the ELT button which began flashing and evacuated through the same opening. There was no fuel leakage or fire at all. We did an inventory of each other to be sure we weren't significantly injured. We gathered ourselves and devised a plan and made sure the aircraft was safe to approach. Then, returned to fuselage to recover the emergency gear to include a survival kit. We moved away from the aircraft hit the SOS button on my Delorme In Reach GPS tracker. I received a text from their emergency monitoring center. We text we were uninjured in a plane crash in the snow covered mountains. They knew our altitude, latitude and longitude position. We hiked to a known open area and alerted emergency services of our intention and location. A 3 person rescue team on snowmobiles reached us there at approximately 6:00 PM. We were transported back to the Mackay Fire Department arriving at approximately 7:45 PM prior to darkness.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

Good question. I am a professional Pilot and the weather changed rapidly, I am happy to educate others to avoid a situation even on a day like we had. I was attempting to stay ahead of the weather and watching for any hazardous conditions. This has been a very unusual weather season and unpredictable that should have been an identifier to avoid. I am happy we are alive and without injury.

Obviously not flying in the mountains at all or simply staying much higher to counter this type of downdraft event.
