Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Tuesday, March 28th, at approximately 9am, at Albert Whitted Airport, the pilot and I took off on runway 7 to practice 2 wheel landings with touch and go's in the pattern. This incident happened after the second successful 2-wheel touch down. After touch down, the plane yawed to the left and the pilot pushed the right pedal to compensate for left yaw. The pilot may have overcorrected as the pedal pressure was too much, resulting in the plane turning/yaw 90 degrees to the right, off the runway and onto the soft grass in a second. The right main tire dug into the soft dirt preventing tire rotation, which resulted in the nose of the plane hitting the ground. The attitude at full stop was nose down, tail up. The increased nose down attitude may have been aided by a slight down slope in the grass (a ditch) where the plane left the runway. Both the pilot and I exited the plane with no injuries, which is attributed to the use of the 3-point shoulder harness and seatbelt
