NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On April 3, 2017 I took a friend for a local flight. I checked NOTAMS and weather on Foreflight, S52 was not reporting. We went up valley and returned for landing. I observed the wind sock which was indicating a landing on 28. That was the runway we took off from. I activated the lights and we were red over white. Everything looked good on final. We were approximately fifty feet over the runway when a gust of wind from the south lifted the wing and steered us off the center of the runway. I applied full power and lowered the nose in an attempt to do a go around. I believe the right wing clipped the ground and we cartwheeled. The next thing I knew we were upside down. I made sure my passenger was alright and instructed him to get out. We were both able to exit the plane.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I hvae spoken with other pilots and a CFI. I don't believe there was another action I could have taken to prevent this accident.
