Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right wing damaged and landing gear damaged. Prop strike

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We were returning from Lakeland, FL to El Dorado Springs, MO with a refueling stop at Bessemer, AL. About ten miles out I called for an airport advisory and was told the winds were 310 degrees at 11 and gusty. Holly, in the FBO, said the winds were shifting but were generally favoring Runway 23. I reported left base for Runway 23 and the approach was normal with touchdown about normal considering the wind conditions. I believe I lost control as I was lowering the tail with little rudder control and tail wheel not in contact with the runway. I started to the right which was consistent with the wind at that time. As I corrected to the left, I lost control and did a half ground loop to the left. This was very gentle and as the aircraft came to a stop on the runway my wife and I exited the aircraft with no injuries at all. As we stood on the runway waiting for the aircraft to be removed we noticed that the wind was shifting about sixty degrees from about 280 to 340 degrees, our best guess looking at the wind sock. Simply stated we experienced the classic ground loop.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Select airport with more favorable winds.
