Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

left wing tip & aileron damaged

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Wednesday 4/19/2017 around 17:45pm,
 I was cleared to land 16R at KUNY.
 Approach and touch down was soft
 smooth and uneventful. I brought
 my tail wheel down and as I did so,
 sudden gust of wind picked up my
 right wing and turned aircraft into the
 wind, ground looped and got off the
 runway. Where it momentarily tilted,
 touched the ground with left wing wing tip
 and came back to stop on all three points.
 Unexpected maneuver was not violent.
 Pilot and passenger were completely unhurt.
 There was no airport property damage.
 Aircraft was secured and towed away
 to the parking location

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

If assigned by ATC Runway 16 R was switched to 34L when winds are from the North, it would alleviate pilots operating w/ a tail wind especially in taildraggers.
