NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Friday, April 21, 2017 at approximately 1500 local time I departed from Draughon-Miller Central Texas (KTPL) in Temple, Texas for a solo 12 mile, 8-10 minute VFR flight to Skylark Field (KILE) in Killeen, Texas.

At 10 miles east of KILE I verified the weather conditions at the airfield via the KILE AWOS-3PT. Wind conditions were reported at 180 degrees gusting 6-8 knots above the sustained velocity.

Due to wind conditions, I made the decision to approach runway 19 with a lower flap setting and a higher power setting with increased speed.

At a few feet above the runway while transitioning from descent to round-out but prior to landing I experienced an unexpected nose down pitch with an immediate impact of the front tire on the runway. The impact was sufficient enough that I believed I had experienced a propeller strike. The airplane then bounced and began to porpoise. Because I believed the propeller, and possibly the engine, had sustained damage I did not add power to the engine to attempt a go around.

Once the airplane settled onto the runway and transitioned to a roll I immediately exited the runway and checked the engine instruments. I then determined that I had not experienced a prop strike, had nose wheel steering capacity, and subsequently taxied the airplane under its own power and steering to the hanger.

I immediately contacted a mechanic and requested that the airplane be inspected. The mechanic inspected the airplane at approximately 0930 local time on Saturday, April 22, 2017 and determined that the firewall of the aircraft had been bent. At approximately 1030 local time the mechanic contacted me and advised me to ground the airplane and contact the NTSB as per NTSB-830 requirements. At approximately 1100 local time on Saturday, April 22, 2017 I contacted the NTSB to report the accident.
