

Hi, my name is Levi VAN Kempen. Today Friday
28th of April we took off from Baker (~~2017~~²⁰¹⁸).
I climbed and when I leveled off my passenger
told me on a certain moment he did not feel well.
He told he was fainting and did not feel his arm
anymore and had a pain in his chest. I was
on my way to Henderson (HND). At a certain
moment he was shaking and suddenly not
responding anymore. He looked very white.
I made the decision to take Jean (PL7) as my
destination. My thoughts about my friend was that he
was having a heart attack. I started my descent
I tried to call Las Vegas App, Las Center and Dagb
for assistance. Jean as well. No respond. My last
option was 121.5. Which worked. I asked for an ambulance
to PL7. I was descending with some turbulence
I had the runway in sight and I contacted the airport on
120.9. I went for Runway 20R left traffic. My friend
looked unconscious at that moment. I had to make
a go around because I saw I was not gonna make
it. So I did. ~~The second time~~ I made another
turn and tried to set me up for 20R again.
Unfortunately that did not work out perfectly. I shot
over and ended up in the grass at the end of the runway.
I tried to keep the plane in level and ~~balanced~~^{balanced} as I could

I shot off everything the moment when I stopped. ~~After~~
~~the minutes~~ Especially everything that had to do with
the fuel. We climbed out the plane and we helped
our friend to pull him out. I saw no fire. I called
911 immediately. I stayed with my friend while
speaking with 911.

28th April 2017
