Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

NO property Damage -
unit needs blades and right gear replaced - Also
tail cone skin

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed at 270 into 15 kt wind
after 50' AGL I realized I didn't have much tail rotor
effect I decided to set it down and let it out. at 3'-5'
above the ground when settling, the tail started to come
around - counterclockwise (as I expected) what I thought was
a nice grassy spot to land was a car muffler lying
there which the right gear landed on. it slide off the
right side of that and the right gear folded causing
a Dynafix Rollover. rear blades were almost no damage
the tail was damaged as well as the gear and main
blades and windshield.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I believe I was encountering too much wind for this aircraft.
