Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

- ① main landing gear mount broken, ② wheel pants broken ③ Tips on all three prop blades broken.
④ fiberglass fuselage side above landing gear torn.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

This was a local flight to practice take-off and landing skills. Preflight inspection showed no aircraft damage and all systems were operating normally. The take-off was uneventful. I made a normal landing pattern for runway 35 at KEGT. With full flaps down I was attempting a minimum speed, 3 pt, landing. It appears that about 4-6 ft. I let the aircraft get too slow and I think the wings stalled which dropped the nose down hitting hard on the runway surface. The plane veered about 20 ft off the right side of the runway and stopped in a tail high position. I secured the aircraft and left on foot to the hangers.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I believe that more dual time with
with a proficient tail wheel pilot would
have helped. An audible airspeed
announcer might also have been a
good aid. Practice - Practice - Practice.
