Re; Accident of Cessna C177B N34207 at Aero Estates (T25) on May 10, 2017 at approximately 3:30 pm.

Pilot and only occupant Kenneth Kessler was returning from Wood County Airport (Kjdd). At arrival to T25 the weather was overcast at about 3500 ft with mist and occasional light rain. Visibility was greater than 5 miles.

A left approach was made to runway 27. A slight south wind resulted in the turn to final offset to the north. This was corrected to intersect runway centerline at the end of the runway. As the flair to landing was initiated a rain shower started, obscuring my forward view. The aircraft drifted to the south, off the crown of the runway onto the slope down to the trees.

By the time I was aware of my position it was not possible to correct, and the left wing tip hit some brush. This turned the aircraft to the left with the engine hitting a tree, and then on around so that the right wing tip another tree. The aircraft came to rest facing east.

I sustained a few minor abrasions to my forearms, and no other injuries. The aircraft sustained major damage.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Although the south crosswind is normal for our runway and the condition is expected, landing a little long will bring you to the raised portion of the runway that is crowned with trees on either side. Landing long was my mistake and I lost my vision of the runway during the flair.
