NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Saturday May 13 at 1300 I was intending to leave the Antique Aerodrome airport (9WS2) in DePere, WI and head to KRYV. My passenger, Krystine Brown and I had been attending a meeting of the QAS, a club designated for female pilots. Krystine Brown is also a certified pilot. We looked at the windsock positioned on the hangar and the winds were variable but seemed to favor 25°. I did a preflight inspection of the plane and everything seemed in order. Upon starting the plane I tuned the radio to KGRB atis but the radio did not pick it up although we had it prior to landing. Based on the windsock and the fact another aircraft had departed on runway 18 about 30 minutes prior, that is the runway I chose. We taxied to 18, I told my passenger we were going to do a soft field/short field takeoff. I put in 10° of flaps, did not stop the aircraft due to soggy conditions on the grass airstrip, put the ailerons into the wind, stepped on the right rudder, put in full power and pulled back on the yoke. The nose immediately came up. Within about 10 seconds a very strong gust of wind blew us to the left and into tall grass. We straddled a drainage ditch until the nose wheel caught on something. At that point the right wing elevated and the plane flipped coming to rest with the fuselage in the ditch suspended by the wings. My passenger and I were able to exit the plane immediately via my pilot side door.

Narrative History of flight cont'd.

A farmer who had been watching nearby was the first on the scene. After asking if we were ok he then told us about the gust of wind. He said it was so strong that he thought the plexiglass windshield of his gater (farm-utility vehicle) was going to break due to the gust.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I will never again fly out of an airport where the only windsock is not on the runway and the airstrip is bordered by a drainage ditch.
