Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was in the process of applying fungicide to the wheat fields in the vicinity of the incident. I had conducted a high reconnaissance of the wheat field just north of where the aircraft came to rest. This consisted of my flying the aircraft over the tree line east of the field that separated it from the road. While conducting my reconnaissance, my attention was split between the actual wheat crop on the field and what was being indicated by my map. I believe that this caused me to not notice the power line at the north end of the field. Thinking the field was free of obstruction, I descended below the tree line in order to begin applying fungicide. At this time I was still attempting to compare the crop on my field to my map, and was not looking outside the aircraft as diligently as required. When I did move my attention outside the aircraft, I noticed power line at eye level and closing rapidly. I immediately lowered my collective and pushed forward on the cyclic in an attempt to avoid the power line. I heard a loud crashing noise. Immediately after that I felt that the rotor system was out of balance, but the aircraft was still flyable. I continued to fly south out of the wheat field and landed the aircraft.
