NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

146 has east-west runway. About 120' west of runway is St Route 53 -- a busy highway with auto and Truck Traffic

I planned a short local flight. I departed Fremont 146 and traveled about 20 miles West and turned around to come back on 09. 146. I used my Garmin 530 glide slope Tuned to the RNAV 09 Approach for Vertical Guidance as there is no VASI. On low approach I saw multiple cars and trucks (18 wheelers with enclosed trailers) going both North & South on St Rt 53 near the west end of the runway. I thought I was high enough but as I crossed Rt 53 the landing gear struck near the top of a truck trailer. I later learned the front gear struck in the trailer. I proceeded to land on the runway on the main gear which quickly gave way; left first, then right. The plane veered to the left off the runway and slid to a stop in the grass 20' from the runway. There were no significant decelerations & the ELT did not go off.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Come in higher to land; however, the Aztec uses a lot of runway to land so there is a relatively narrow window for a safe landing.

For corrective action, effective June 1st, 2017 I will be moving my other plane (Acessna 182, N4648E) to 524 and will no longer be landing at 146.
