Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to both wing tips, tail strike

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On May 2, 2017 at 1200Z, my student and I departed PDK to practice landings on runway 26 at FTY. While there, we did 3 touch and goes, a go around, and a full stop to park at the Hill Aircraft FBO. After a 15 minute break, we departed northeast to PDK. The ATIS reported winds 260 at 8 knots. We entered a right downwind for 21R. The student was late turning base to final. We were approaching the numbers of 21R and still left of centerline. I added full throttle to go-around. The student pulled the nose up and the airplane stalled. I lowered the nose; however, the plane was in a secondary stall as it struck the surface. We bounced a couple of times before coming to a stop just short of taxiway F. We taxied off the runway and waited for airport security to inspect the aircraft. After that, we taxied to Skybound Aviation's maintenance hangar on the northwest ramp. It was then that we saw that both wings and the tail had struck the surface.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The instructor should have taken over the flight controls as soon as recognizing the student's inability to adjust to the 8 knots of crosswind.
