Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Wing damage, Landing gear broke off.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Sequence of events:

This flight was to get current with three take-offs and landings.

I left Lebanon (S30) on runway 34, at 12:00pm, with wind from the west, for Albany (S12) practicing slow flight and a stall on the way. S12 had wind from the south and I did two good landings to full stops on runway 16. I felt comfortable for the cross-wind at Lebanon (S30) on the return flight.

On final at S30 on runway 34, the cross-wind was from 270 at 10-15 knots. Wind was gusting and bouncing me around some but I set up fine at 65mph, setting down at about 60mph.

When I was first on the ground, everything seemed fine. As I was slowing down the wind picked up and was trying to turn me into the wind. I got the airplane under control but again the wind started weathervaning me with some sideways sliding.

This is when I gave it full power to go around. As I was getting off the ground just a foot or two the wind was rapidly pushing the airplane to the right and knowing I couldn't climb fast enough to clear the top of the hangars on the east side of the runway, I pulled power back.

Touching back down now I was going off the runway, through the grass, down into a ditch, breaking off the right landing gear, and coming to a stop on the taxi-way.
