Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> The owner will have to elaborate on damage. At the time, the front tire was flat, and front gear no longer extended. After landing, I found there had been a prop strike.					
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>					
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible. I departed KGTU around noon. I flew directly to KAQO intending a touch and go, then return to KGTU. I did a right pattern approach to runway 17. About the time I cleared the runway threshold, the nose dropped suddenly and the plane bounced on the runway. I could tell the front wheel was flat and I taxied off the runway. I stopped on the edge of the taxiway and called in the damage, then noted the prop strike. I don't recall the specifics of the weather, but I did get the automated weather 10 miles out. The wind was modest, reasonably aligned with the runway (no significant crosswind). It seemed a bit gusty after I landed, but that was not in the automated report. Visibility was clear for the approach, in the pattern and for final.					

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The sudden drop was a surprise to me. I wasn't prepared for it and I can't identify the exact cause. Its possible that an immediate restoration of power after the nose drop would have helped (which would be a training recommendation), but it would not have prevented the bounce.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
