Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The nose gear collapsed, causing both right and left props and the fiberglass nose to contact the runway, both engines stopped suddenly.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed solo from 5B6 (Falmouth Airpark) at approximately 8:20 AM with approximately 100 gallons fuel on board. I briefed on line for weather and NOTAMS. Forecast was VFR the entire route of flight. The pre-flight inspection, run up, take off and cruise were all normal and routine. Winds aloft at 10,500 were 230 @ 33 knots. Approaching 76N (Skyhaven) I called Unicom and was advised 19 was the active runway. I entered pattern on a 45 to downwind. I observed the windsock which indicated gusty conditions, but generally aligned with the runway. I extended base leg and turned base to final with flaps set at 10 degrees (normal flap setting), gear down, and airspeed stabilized at 10 knots above blue line, and carrying about 18" of power. I approached at an approximate 3 degree profile with a 300-500' per minute decent. I set up for a touchdown point just beyond the displaced threshold. After I transitioned into ground effect, the airplane suddenly, and without an aural stall warning, lost lift and was "forced" onto the runway in a wings and nose level attitude. The nose gear collapsed, causing both right and left props and the fiberglass nose to contact the runway. Both engines stopped suddenly, the right main tire blew, and the plane veered to the right off the paved runway into the grass. The plane came to rest approximately 300' feet from the initial point of touchdown. I secured the fuel by selecting "off" on both tanks, and turned off the master switch, and then exited the aircraft. I observed no fuel leaks and no fire. Shortly thereafter, I called the main FAA number, and got the answering machine. I continued to make attempts to contact the FSDO, and eventually got through and made notification. I was advised that the FAA would be sending two members from their office to 76N. Approximately two and a half hours later, I was met by Inspectors FERENCE and SABIAN of the Allentown FSDO. The Inspectors conducted their preliminary investigation to include pertinent pilot's certificates, as well as the aircrafts Certificate of Airworthiness and FAA registration documents. At the conclusion of the inspection, the Inspectors released the aircraft and advised me to notify the insurance company and advised that I could make a written statement at a later date.
