Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft sustained prop strike, engine mounts broken and aircraft came to rest upside down, damaging tail surfaces and 1 aileron.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed KHWY, at 11:00 AM on May 21 solo after a fuel stop, arriving at 29VA (Rhynalds Landing) at 11:10. I picked up Don Rhynalds and departed from 29VA heading northeast to Maples field around 12:30 PM on May 21, 2017. The flight was no more than 10 minutes. As I approached the field I had to come in slightly higher than anticipated in order to clear the power lines that are in close proximity to the field. When I surveyed the field to determine which approach to take, I identified what I thought was the runway. I lined up with runway 22 and managed my speed and descent rate appropriately in order to clear the sheds/hangars at the end of the runway. When I was clear of the buildings and I knew the runway was made my focus changed to the far end of the runway in order to monitor sink rate for the landing flare timing. When I noticed that I had incorrectly identified the wheat field as the runway, the wheels of my airplane were already starting to become entangled in the wheat. Then, very quickly, the wheat had arrested the forward momentum of the airplane and forced it on its nose and then onto its back. At this point my focus was on my passenger, 85 year old Don Rhynalds of Bealton, VA. Some of the people at the field were able to help to get Don safely out of the plane to await the EMT's.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Since this field was new to me, a second pass should have been made to better familiarize myself with the field. I had full fuel so time was not an issue. I was concerned that I was in close proximity of the Washington DC SFRA so I flew a very tight pattern as not to violate that airspace. This restricted my view of the landing strip. Had I taken another pass to survey the field more thoroughly this accident may well not have occurred.
