Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Bend rear spar on both wings,
damaged ribs on both wings,
Bent axle on right gear leg

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approx 12:25pm I departed runway 36 Talkeetna for participation in a slow flight competition. While over the target area for the radar speed check my left wing stalled at an altitude of 30 ft agl, at 17mph ground speed. Without sufficient altitude for recovery I opted to let it stall to the left to avoid hitting a state truck and four ground crew, resulting in my left wing contacting the ground, followed by the right wing tip hitting the ground.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

It could have been conducted at an altitude of either 5 ft agl or at an altitude sufficient enough to recover from a stall spin.
Could have been going faster
Could have not participated
