Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> NOSE DAMAGED, NOSE GEAR BROKEN, LEFT ENGINE PROP STRIKE, LH WING BENT. TAIL STRIKE, LH SIDE FUSELAGE DAMAGE, RUDDER LOWER DAMAGE, RH ENGINE BROKEN FROM NACELLE, RH WING BROKEN, LH WHEEL/BRAKE DAMAGED.		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i> Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. Providing lift services for commercial sport skydiving. I had a potential new hire pilot in the right seat for evaluation to hire. He was flying from the right seat throughout the day, with me following up on the flight controls in critical phases of flight including takeoffs and landings. During the day the winds had been switching direction and there were occasional dust devils around the airport. It is normal for such occurrences at Perris Valley especially in the summertime. Eighth flight of the day we departed runway 15 normal take off at approximately 14:45 local time with 21 jumpers and two loads of fuel on board plus reserve. Climbed to 14000 MSL for normal jump operations. Normal descent to approach called for a ground wind check upon approach. Ground winds reported from the south and recommended to use runway 15. We made our approach to land runway 15, noted a dust devil just Northeast of runway 15 on the approach. I briefed the go around procedure to be prepared to go around as necessary. Landing flaps of 10 degrees selected and 80 knots indicated on a steady approach, left wing down on centerline. James Lee the copilot was flying at the time with me following up with my hand on the yoke and covering the tiller for once we touched down for steering. Approximately 200' South from the threshold of 15 at approximately 15 feet AGL the bottom violently and unexpectedly dropped out. Believe some kind of wind shear caused the aircraft slam onto runway and bounce into the air at a 45 to 60 degree bank angle to the right. At that time James said "you got it" there was a transfer of controls. I applied left full aileron and rudder could not get the wing down. I said "were going around" go around power was applied only to aggravate the off runway heading. The right wing contacted the ground at a high bank angle, unable to get the up wind wing down. Departed runway to the west midfield headed for a parked fuel truck on the west midfield ramp. I pulled the power and expected impact, there was no where to go. Impacted fuel truck with right wing and engine. The right wing tore from the airplane, at impact the g force caused me to apply max power to the engines. The right engine was apparently destroyed from the impact, the running left engine at max power causing sharp ground loop. During the ground loop realizing I was at max power I pulled the throttles to idle and came to an immediate stop. I shut down engines and James and I evacuated through the cockpit doors with no fire or additional injuries to persons or property. All wreckage remained in the immediate area with outboard wing coming to rest behind the fuel truck. The event ended at approximately 15:15 Local Pacific time. Patrick Merle Conatser PIC		

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Total Time/Cycles
On Part

_____ Hours

_____ Cycles

Time Since This Part
Inspected/Overhauled

_____ Hours

FUEL & SERVICES INFORMATION

Fuel on Board at Last Takeoff
(Convert from pounds, as necessary)

120 _____ Gallons

Fuel Type

☐ 80/87 ☐ 115/145 ☐ Jet B ☐ Other, specify _____
☐ 100 Low Lead ☒ Jet A ☐ JP8
☐ 100/130 ☐ Jet A-1 ☐ Automotive

Other Services, if Any, Prior to Departure

EVACUATION OF AIRCRAFTWas an emergency evacuation of the aircraft performed? ☐ Yes ☒ No

Method of Exit – Describe how the occupants exited and how many occupants evacuated each location

PILOTS ONLY ONBOARD EXITED THRU COCKPIT DOORS

OTHER AIRCRAFT – COLLISION (If air or ground collision occurred, complete this section for other aircraft)
