Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to left wing of the Cessna U206 approx 2' from wing tip And damage to the Bell 407xp parked on the ramp approx. 2' off edge of runway. The damage was to the vertical stabilizer and 1 tail rotor blade of the 407

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I flew 2 loads of Skydivers earlier in the day and this was the last load of 1 tandem and 2 fun jumpers. The time was 5:02 pm EDT and the winds were 250-270 12mph gusting to 20mph. I normally take off to the north on runway 4 but the winds more favored runway 22. The Air methods Bell 407, which is based at 83K, was sitting on its dolly at the end of the ramp approx. 2-3' off the edge of the runway. The ramp is approx. 3/4 of the way down runway 22. I back taxied down 4, did my run up and check list and proceeded my take off roll. As I was just ready to lift off a gust of wind through me off centerline, to the left, and tried to correct but the Bell 407 was in my sight with not enough time to avoid it so I shut down the power, impacted the vertical stabilizer with my left wing, and landed safely in the field off the runway and taxied back to the hanger area. There were no injuries of any kind and the damage to the 206 was to the left wing only

RECOMMENDATION (How could this accident/incident have been prevented?)															
Operator/Owner Safety Recommendation This was an avoidable accident in the way that the Bell 407 should not have been parked so close to the edge of the runway during the skydiving operations and me, the pilot, should have more diligent in having the 407 moved before takeoff.															
MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)
