NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Weather: wind-VRB/6, Visibility 6 miles, cloud-voercast at 1900feet .

I have 3 landings in full stop with my instructor before, then taxied to EAST TRANSIENT PARKING , dropped off instructor and another student. After that, taxied back to runway 27L and began my solo flight, the first one was safe.

In the second one , I maintained approach speed at 65 kt, altitude at 700-800feet on Final , power idle when the aircraft over the threshold and pitched up to entered the flare . Airspeed was 60 kt , but nose wheel touched ground first , and aircraft bounced up , jumped higher and higher , kept 4 or 5 times . I thought I can not land on the runway in these circumstances , so I choose to take off, full power, flap 20 degree, airspeed 60 kt, flap 10 degree, airspeed 65 kt , flup up, and did one more traffic pattern and landed on the runway 27L, and taxied to EAST TRANSIENT PARKING and picked them.

All landings were normal landing in full stop except the second one. I meet crosswind come from left on flare and let aircraft off course.

Yan Li

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Scandinavian Aviation Academy Inc (SAA) will provide Mr. Li counseling and ground training on airplane upset causes, upset prevention techniques and strategies, and upset recovery procedures. There will be a special emphasis on recoveries from bounced landings. Yan Li will also be provided flight training to help Mr. Li recognize an airplane upset, prevent airplane upset, and recover from airplane upset. As with the counseling and ground training there will be an emphasis on bounced landing recovery. The completion standard for this training will be proficiency.

SAA will also use this occurrence to reach out to our community, the students and instructors, to educate them on the principles of Upset Prevention and Recovery through a safety seminar.

All of this training will utilize the numerous resources provided by the FAA regarding Upset Prevention and Recovery Training (UPRT).
