Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop Strike, Nose Gear collapse, canopy structure crushed vert stab bent. Other unobserved in accident location.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We flew to Windwood an airport in WV (WV62) from Leesburg (JYO) to have lunch and take a walk in a nearby nature preserve. There is no AWOS. We got the weather for Winchester and Petersburg WV. We overflew the airport to check the windsock. The windsock stood full and was perpendicular across the runway. We flew a normal pattern and made a full flaps landing approach at about 60-70 knots. Just as the main gears were about to touch down or perhaps a second or two after that a gust of wind carried us to the right of RWY06 which was soft wet earth. When the nose gear came down it rolled up and the plane flipped over on its back. I asked my daughter if she was alright and she said she was OK. The canopy was crushed down and it took me some time to break out enough plexiglas to crawl out. Claire was trapped in the back seat and I removed more plexiglas around her. Some local people got under the wing and lifted it and I was able to help her out. I believe that both the seatbelts held fast and the roll-bar protected us. I do not believe that we made a hard landing or that any physical aspect of the airplane failed. We were extremely fortunate. One of the EMT's or firemen, who identified himself as a pilot said the wind had shifted and I had a quartering tailwind with gusts when I landed. I did not know at the time, but have every reason to believe he was correct and our pattern time was just unfortunate.

RECOMMENDATION (How could this accident/incident have been prevented?)													
Operator/Owner Safety Recommendation AWOS at the airport would be helpful.
