

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Payson State: AZ

ZIP: 85541 Country: USA

Latitude: 34:15:50.6 N Longitude: 111:21:56.7 W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 06/04/2017 Local Time: 10:22 AM

mm/dd/yyyy

Time Zone: MST

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N50526

Manufacturer: Cessna

Model: 172M

Serial Number: 17264211

Year of Manufacture: 1974

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 2,300 lbs

Weight at Time of Accident/Incident: 2,111 lbs

Number of Seats: 4 Flight Crew Seats: _____

Cabin Crew Seats: _____ Passenger Seats: _____

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
- ☐ Aerobatic
- ☐ Balloon
- ☐ Commuter
- ☐ Transport
- ☒ Utility

Special

- ☐ Restricted
- ☐ Limited
- ☐ Provisional
- ☐ Special Flight
- ☐ Experimental
- ☐ Special Light-Sport
- ☐ Experimental Light-Sport

- ☐ Certificate of Authorization or Waiver (COA)
- ☐ None
- ☐ Unknown

Landing Gear

(Check all that apply)

☐ Retractable

- ☒ Tricycle
- ☐ Amphibian
- ☐ Emergency Float
- ☐ Float
- ☐ Hull
- ☐ Other Launch/Recovery System
- ☐ None
- ☐ Tailwheel
- ☐ High Skid
- ☐ Skid
- ☐ Ski
- ☐ Ski/Wheel
- ☐ Unknown

Engine Type (Select one)

- ☒ Reciprocating
- ☐ Turbo Shaft
- ☐ Turbo Prop
- ☐ Turbo Jet
- ☐ Turbo Fan
- ☐ Electric
- ☐ Liquid Rocket
- ☐ Solid Rocket
- ☐ Hybrid Rocket
- ☐ None
- ☐ Unknown

Fuel System Type (Reciprocating)

- ☒ Carburetor
- ☐ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Rated Power ☒ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since: Inspection (hours)	Overhaul (hours)
Eng. 1	<u>Lycoming</u>	<u>O-320</u>	<u>L-39888-27A</u>		<u>150</u>		<u>40.7</u>	<u>2467.0</u>

Eng. 4								

Last Inspection Type

- ☒ 100-Hour
- ☐ AAIP
- ☐ Annual
- ☐ Continuous Airworthiness
- ☐ Conditional Inspection
- ☐ Unknown

Date Last Inspection: 05/17/2017
mm/dd/yyyy

Airframe Total Time: 5320.6 hrs

hours measured at (Select one)

- ☒ Last Inspection
- ☐ Time of Accident/Incident

Type of Maintenance Program (Select one)

- ☐ Annual
- ☐ Conditional (Amateur-built only)
- ☐ Manufacturer's Inspection Program
- ☐ Other Approved Inspection Program (AAIP)
- ☐ Continuous Airworthiness
- ☒ Other, specify: 100 Hour

Description of Fire Extinguishing System

- ☐ None
- ☒ Specify: Hand-held

Propeller 1

- ☒ Fixed Pitch
- ☐ Controllable Pitch
- ☐ Ground Adjustable

Manufacturer: McCaughey

Model: 1C160-DTM

Propeller 2

- ☐ Fixed Pitch
- ☐ Controllable Pitch
- ☐ Ground Adjustable

Manufacturer: _____

Model: _____

ELT Installed: ☒ Yes ☐ No

If Yes:

ELT Manufacturer: _____

Model or Part No.: _____

TSO No.: ☐ OC91 (121.5 MHz) ☐ OC91a (121.5 MHz)
☐ OC126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No

Was ELT still connected to antenna? ☒ Yes ☐ No

Did ELT Activate? ☒ Yes ☐ No

If activated:

Did ELT Aid in Locating Aircraft? ☒ Yes ☐ No

If not activated:

- Indicate Reason:
- ☐ Impact Damage
 - ☐ Fire Damage
 - ☐ Battery Expired/Damaged
 - ☐ Unknown

Additional Equipment (Check all that apply)

- ☐ ADS-B
- ☐ Airframe Parachute
- ☐ Angle of Attack Indicator
- ☐ Autopilot
- ☐ Data Recorder
- ☐ Electronic Flight Bag or Handheld Device
- ☐ Electronic Multifunction Display
- ☐ Electronic Primary Flight Display
- ☐ Handheld GPS
- ☐ Heads Up Display
- ☐ Onboard Weather
- ☐ Satellite Tracking Device
- ☐ Stall Warning System
- ☐ Video Recording Device
- ☐ Other, Specify: _____

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft sustained damage to the forward fuselage upon impact with a tree and the ground at crash landing site. Aircraft and tree were subsequently destroyed by ensuing fire on the ground.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After departing Falcon Field (KFFZ) Mesa, Arizona on June 4, 2017 at approximately 09:36 AM (MST), I began to proceed along my planned route of flight to Payson Airport (KPAN), Payson, Arizona for a short stopover for breakfast at the Crosswinds Grille with my brother, Derek White, who was my passenger on the aircraft. I had planned to fly in a northerly direction along the Verde River using Fountain Hills (VPFTN), Rio Verde Community (VPRVC), Bartlett Dam (VPBAR), Horseshoe Dam, and Pine Mountain as checkpoints enroute to KPAN.

Upon reaching my final checkpoint (Pine Mountain) at approximately 10:07 AM (MST), I retuned radios to 119.325 MHz (AWOS-3) and 122.8 MHz (CTAF) to monitor weather and traffic while inbound to KPAN. After receiving a weather update and resetting the altimeter, I continued to monitor 122.8 MHz for traffic. Upon turning toward the east to set up for my descent and approach to KPAN, I reported my position (approximately 15 NM west of the field) and intentions (full stop landing), and requested weather and traffic advisories. According to my recollection, there was no significant change in the weather (from my preflight review of weather conditions) and very little traffic reporting on the radio, so I continued my approach to KPAN while accomplishing my Descent Checklist.

After two-more position reports (at approximately 10 NM and 6 NM), I descended to the Traffic Pattern Altitude (TPA) of 6,200' MSL, reported my entry into the right downwind for Runway 24, and completed my Landing Checklist. Once abeam the numbers on the western part of the runway, I began to configure for landing by decelerating and engaging the flaps at 10-degrees. I continued to descend while on downwind (at approximately 300'-400' per minute) until the numbers for Runway 24 were approximately at my 4 o'clock position, then I turned right for base leg, reported my position, leveled my wings and deployed flaps to 20-degrees. Lastly, I turned right for final approach, reported my position, leveled my wings and deployed flaps to 30-degrees for landing on Runway 24.

As I approached the runway threshold, I felt the aircraft begin to drift to the right of the runway centerline, and rather than attempt to make any abrupt maneuvers to "save" the landing, especially with a passenger on board, I elected to reject the landing by reporting and executing a "go-around" procedure. After applying full throttle, turning off carb heat, retracting the flaps to 20-degrees, and pushing the nose of the aircraft down to gain airspeed, I noticed that the aircraft began to settle into ground effect.

As I continued to fly above the runway, I noticed that the far end of the runway began to rise in elevation, and I recalled the noise abatement procedure to turn to heading 270-degrees to avoid overflight of houses located one-half mile west of Runway 24. Based on these considerations, I continued to fly in my current configuration (20-degrees flaps) while maneuvering toward a westerly direction in an attempt to avoid the houses and gain both airspeed and altitude.

After clearing the houses, I continued to fly in a westerly direction looking for an area to safely retract the flaps to 10-degrees. Because of the nature of the terrain that we were flying over (pinyon-juniper forest) and our proximity to the ground, I felt that retracting the flaps to 10-degrees at that time would have caused the aircraft to settle into the trees instantaneously.

In the meantime, I continued to scan the horizon looking for low areas above the forest that I could fly over as we made our way westward toward the edge of the mesa that the airport was positioned on. My intention was to fly into the valley located to the west of the mesa to regain airspeed and altitude. Because the terrain toward the edge of the mesa continued to rise faster than I could gain airspeed or altitude, the aircraft eventually struck a tree and settled on to the ground at a location approximately 1 NM west of the airport around 10:22 AM (MST).

Continued at Additional Information Section, Page 11.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Periodic review of aircraft performance as it pertains to performance data and atmospheric conditions, especially density altitude and its effects on performance using the Pilot's Handbook of Aeronautical Knowledge, Chapter 10, Aircraft Performance. Review of FAA safety publication on Density Altitude, FAA—P—8740—2 • AFS—8 (2008) HQ-08561. Emphasis on aircraft performance planning as an essential activity during mission planning prior to flight.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No*(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)***Total Time/Cycles

FUEL & SERVICES INFORMATION**Fuel on Board at Last Takeoff***(Convert from pounds, as necessary)*37 Gallons**Fuel Type**☐ 80/87☐ 115/145☐ Jet B☐ Other, specify _____☐ 100 Low Lead☐ Jet A☐ JP8☐ 100/130☐ Jet A-1☒ Automotive**Other Services, if Any, Prior to Departure**

None

EVACUATION OF AIRCRAFTWas an emergency evacuation of the aircraft performed? ☒ Yes ☐ No**Method of Exit** – Describe how the occupants exited and how many occupants evacuated each location

Both occupants exited the aircraft through the passenger door located on the right side of the aircraft. Immediately after the crash landing, the passenger was instructed to open his door, unfasten his seat belt and shoulder harness, and exit the aircraft. I was able to follow the same exit route as the opened and operational passenger door represented the most expedient means to egress the aircraft.

OTHER AIRCRAFT – COLLISION (If air or ground collision occurred, complete this section for *other* aircraft)**Aircraft Registration Number**

Manufacturer: _____**Model:** _____**Damage to Other Aircraft**☐ Destroyed☐ Minor☐ Substantial☐ None**Registered Owner of Other Aircraft**

Country: _____

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Continued from Narrative History of Flight Section, Page 9.

After realizing that we were on the ground and not seriously injured, I instructed the passenger to open his door and egress from the aircraft. During egress, I assisted the passenger by unlatching his shoulder harness and made certain that he was able to exit the aircraft. Next, I obtained the fire extinguisher that was located between the front seats and began to extinguish a small fire that had begun near the firewall on the passenger's side of the aircraft. Finally, I unfastened my seat belt and shoulder harness, grabbed my flight bag, which had fallen into my lap during the crash landing, and exited the aircraft through the passenger door and rejoined with my passenger on the ground away from the aircraft, which had started burn more intensely.

Once we were clear of the aircraft, I obtained my backup transceiver, turned it on, and tuned it to 121.5 MHz, where I noticed that the aircraft ELT had been activated. I then retuned the transceiver to 122.8 MHz and began to make a distress call, which was immediately received by a U.S. Army helicopter that was in the vicinity and arrived at the crash site within minutes. Shortly thereafter, a U.S. Forest Service helicopter arrived on scene, followed by the Payson Airport assistant manager, local first responders (fire and police department personnel), and U.S. Forest Service firefighters. After receiving medical treatment for minor injuries at the site, we were transported to a location close to a housing area (west of the airport) where we continued to provide information to various local public agencies and officials, including a preliminary telephonic report to the NTSB (Mr. Elliot Simpson).

After being medically released by the local fire department, we accompanied the Airport manager back to his office where we provided contact information, completed a report, and began notification of the accident to our families and others. The Airport manager was able to coordinate vehicular transportation from Payson Airport to Falcon Field in the afternoon and we arrived back in Mesa, Arizona at approximately 4:00 PM (MST).

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
