NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My instructor and I reviewed the weather for SLC and TVY airport. Both locations were in good conditions to fly. We left the SLC airport for Tooele. As we approached the Tooele area we listed to the AWOS, it stated that winds were favorable to practice landings. My instructor and I approached the airport and did four landings. My instructor then told me that she was going to let me practice my maneuvers and stalls around the airport. I departed the airport and decided to try a landing. As I was on final I came in to land and the aircraft ballooned up so i decided to go around. I went around and exited the pattern and maneuvered to the east of the airport. As I was coming back to land and pick up my instructor and return to KSLC I entered the pattern. On final i was approaching the runway to land, the aircraft ballooned up and I added a little throttle the settle the plane. The plane seemed to settle but felt like it was coming down too fast. So I decided to go around. I added full throttle and moved the flaps to 20 degrees. The plane was stalling and so i moved the flaps to 0 degrees which caused the plane to continue to stall. There was then a wing drop to the left, causing the aircraft to crash to the west of the runway.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This accident occurred because the stall warning horn was ignored. To prevent this from happening again, we need to teach pilots that the stall warning horn is where we recover from stalls. The old PTS for private has students ignore the horn and take the stall to the break, or fly in slow flight with the horn on. The new ACS has us recover at the horn and does not want the horn on at all. This new change will help with confusion. As a flight school, we will now be implementing mandatory stage checks for all 141 and 61 students prior to solo. Also all students will under go re-training about stalls on the ground and in flight. We also will cover proper go around procedures in all situations on the ground and in flight.
