Date Report Received

6/22/2017

I got my weather briefing from [REDACTED] at around 10:00 AM after which I filled out and turned in my data card to dispatch. I waited and got my plane at around 10:50. After I got it I went out to it and did the preflight. I walked around it, I checked the oil, checked the fuel, checked everything and nothing was wrong with the plane. Afterwards I got inside and started going over the checklist to get the plane started. I got it started and kept following the checklist. Eventually I started taxiing to the runway where I stopped and did my runup after which I took off at around 11:10-11:15 and went up into the pattern. This lesson was meant to be just in the pattern and I was supposed to do around 4-5 landings. I took off and there was a little bit of crab angle while flying. I went around and came back in to land. Mid way on the runway while in the pattern I pulled out the carb heat and then over the runway letters I pulled out the throttle to 1500 RPM. Once in the white arc I put 10 degrees flaps and then on base I put 20 degrees. Eventually when I turned on final for runway 19 and when I had the runway made I pulled the throttle out and put 30 degrees of flaps in. I came in to land for the first time and I was a little bit to the left of the runway center line, but nothing bad. I landed and taxied back to the runway. I took off for the second time and did everything the same. Once I had the runway made for the second landing I pulled the throttle out and had 30 degrees in again. I came in at around 65-67 knots. I looked straight onto the center line, but as I got closer it looks like I was a bit to the left again. I tried to correct it and get back onto the center by adding right rudder, but I over corrected it and put in too much right rudder causing the plane to go to the right. I realized that now I was going towards the grass and I panicked. I tried to break and go left, but it wasn't enough. Since I panicked my leg kind of got stuck on the right rudder. I got onto the grass and kept trying to break, but I didn't have any luck. The plane eventually went over a ditch, stopped on its nose and then landed back on its tail. I shut down the airplane and then waited for someone to come. The pavement on the runway was dry and so was the grass. It was pretty warm and sunny outside. The weather I got at 10:00 AM was 230 at 8, 10 miles visibility, clear below 12,000, temp 28/18, A30.10 and winds aloft were 240 at 19.
