Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The aircraft suffered damage to the undercarriage, both main struts and nose strut were bent. There was damage to the wheel pants on all wheels, as well as the disintegration of the prop after the prop struck the runway surface. There was no damage to airport property or any other third party property.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Statement from Christopher B. Ward of N251CW accident:

On June 18, 2018, owner of N251CW, Christopher Barry Ward, and Dennis Funnemark, were starting a planned cross-country flight departing from Williston, FL (X60) to south Florida. The weather was clear with light winds at X60. We left from the Revolution Aviation Hangar, and start and taxi to runway 05 were normal. Engine run-up was normal and we taxied into position for takeoff at approximately 0915.

I, Christopher Barry Ward was in the left seat and at the controls, and Dennis Funnemark, was in the right seat acting as the checkout pilot as required by the insurance company. The pre-takeoff instructions on this flight were for me to begin rotation at takeoff attitude, a few knots before the normal takeoff speed of approximately 65 knots and then let the airplane lift off smoothly when it was ready to fly. On previous flights I tended to delay rotation until past takeoff speed, resulting in extended takeoff rolls.

Initial takeoff roll after brake release was normal with the airplane tracking straight down the runway. As we approached takeoff speed I began the rotation, but overshot with the nose a few degrees too high. The airplane lifted off in the ground effect and started to drift to the left toward the edge of the runway. At this point things started to happen very fast. We hit the grass and I started to feel the airplane hitting the prop, wing tip, and landing gear. We had chopped the power shortly after leaving the runway. We slid to a stop, cut off the fuel and master switch, and exited the airplane. Neither one of us sustained even a slight injury, cuts, or bruising. There was no fire. Emergency personnel arrived immediately and we began normal recovery procedures after an incident.

Christopher Barry Ward
