Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Cowl broken, Prop splintered, Engine - many broken parts, Empennage wringled, right aileron badly damaged, canopy crooked and cracked, underside wrinkled with holes, stabilator activator broken, firewall pushed back, longeron rivets pulled loose, nose wheel broken off. Airport sign sheered off.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Student pilot Scott Marsh was completing his scheduled solo flight into the NE practice area of the Eugene Airport at approximately 1820 PDT on Monday, June 19. Mr. Marsh had departed at about 1720 PDT. Upon returning to the airport, he was doing some "stop and goes." He reported the winds were from the 330 @ 9 knots with a clear sky. On his fourth stop and go, he came to a complete stop, set the trim, flaps up and hit full power. He reported that the plane started to fishtail. He then pulled out the throttle, but did not maintain control of the plane. He then went off runway 34 right, across Bravo 3 and hit one taxi light and the taxi way signage. The plane then came to a complete stop. He then turned off all electrical switches and the fuel. He called the tower and reported the situation. There were no injuries.

He then notified Instructor Brandon Wynn who in turn contacted Lane's Chief Flight Instructor Paul Lancaster. Arrangements were made to remove the plane from the runway and place it in the Lane Aviation Academy hangar.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

For the student pilot to maintain control of the aircraft throughout the takeoff roll. The recording device in the Dynon unit indicated a smooth gradual departure from the runway without unusual oscillations ("fishtailing").
