Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Thursday, June 22, 2017 at approximately 4:30PM central time, I (Ben Cadenbach) departed from King Ag Aviation, Inc in Sudan, Texas with a load of 430 gallons and about 100 gallons of fuel. The temperature at the time was approximately 97 degrees. From King Ag I flew to my first target north of Portales, New Mexico. After looking over my target area, I made one pass on the target, then as I was turning to make my next pass I was losing altitude in my turn, so I abandoned my turn to regain more airspeed and altitude. I leveled the airplane and began to ascend. I was headed west and had a large double pole cross country transmission line running north and south through my line of flight. I intended to fly over the line but as I got nearer to the line it became apparent I was not going to make it over the lines and was approaching my stall speed, so I chose to go under the lines. As I leveled out of my descent, my airspeed was still too low for the steep descent and the aircraft settled into the ground underneath the power lines. The aircraft struck the back side of an embankment and then slid across the ground for about 100 feet before turning over and landing upside down. As soon as the aircraft came to a stop, the plane began to burn, I unstrapped from my seat and was able to crawl out of the window to exit the plane.
