RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This was a severe unexpected gust of wind. My perspective given the DA of the field that day potentially do a test low pass to see how winds were low over the runway initially. I am not sure in actuality that is practical. My recollection of the the tower report to me on final approach was that the winds were variable with no mention of severe gusting.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

The most recent period of flying for business has been unusually heavy for me and have been doing alot of aerobatic training in a tailwheel plane as well. In all my flying, I haven't had an incident and ironically this has probably been one of the more busy periods of flying in terms of hours since I began flying. I have replayed this scenario over and over in my mind. I take my flying and training very serious and feel so embarrassed by this incident.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
