

At approximately 10:21 AM June 26, 2017, I was in my office and looked out my window. I noticed a truck pulling a trailer cross the runway. At the same time, I saw a twin engine piston aircraft going down the runway. It had already landed. The right wing ran into a blue truck that was being pulled on the trailer and spun to the right. Both the aircraft and the blue truck on the trailer instantly burst into flames. I then proceeded to call 911 and then Corpus Approach.
