Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

While on a cherry contract positioned on East side of Columbia River along hwy 97 between Entiat and Orondo WA, I was asked to scout some fields I was responsible for and had not yet had a chance to do. Also the company was intending to utilize my helicopter for spraying in the morning. So I was a little heavy on fuel to commence spraying so to accomplish multiple agendas I was scouting and burning off some fuel. I took off from CRO orchard scouted fields and was practicing some approaches, to burn off a bit more fuel. ~~About 16:30 I was to begin~~ I put my clipboard and other items needed to scout field in left seat when done scouting. While coming in on final I hit turbulence and clipboard was lodged into left seat pedals, unable to clear pedals ~~and seemed~~ I looked for a spot to safely set down so I could clear obstruction. Being on ridge that felt the safest course of action given wind and environment. About this time I lost tail rotor authority while 5-10 ft off ground. (About working pace) rotating helicopter nose right. Skinger folded into T/R on rotation given complete loss of tail rotor. After about two rotations I was able to set helicopter down.

Attempting to stay below ridge line and out of wind until short final, hit w/ turbulence and gust while coming into final.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Better cockpit management would have prevented obstruction in pedals.
