Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Main Rotor bent, Tail rotor cracked in half, Tail boom cracked in half, Fuselege dented, skids broken.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I was on a cross country flight with my instructor. We were simulating an emergency which required us to land immediatley. The closest spot to safely land was an old logging road. We did our usual checks, for wind people and power lines etc. I flew a traffic pattern to approach the spot. I came in for a landing and the helicopter was out of trim. Zach, my insturctor told me I needed more left pedal, it felt as though we were flying sideways rather then straight. I thought i'd gotten us into a headwind. On the ground I realized I was mistaken. I had actually set us up into a left quating headwind, or maybe even a cross wind. I came in for a normal approach but I was a little steeper then I would have liked. We slowed down below ETL maybe 10 feet off the ground and still descending. By this point we were what I precieved to be straight, and Zach took controis. From what I could tell he used forward cyclic and left pedal immediatley. It was too late. We started spinning and there was no way to stop it. We did a 540 degree turn, maybe more as we crashed into the side of a hill. The helicopter landed on its side. I was trapped perpendicular to the ground and wasn't able to unbuckle my seatbelt. Zach helped me, and instructed me to leave teh helicopter. From there he secured the fuel, turned the battery off, and sent out an SOS using spider tracks. Then he exited the aircraft himself.
