Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to skids, fuselage, FLIR and spotlight mounted to aircraft. Additional damage was to interior of radio panel. Tail rotor was also damaged.

Damage to hangar metal tin and 2 support beams.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

07/06/17

* Approx. 2256 hrs. - Departed from Kansas Highway Patrol hangar for public use flight searching for a fleeing felon in Douglas County, Kansas.

* Approx. 2320 hrs. - Arrived on scene and began search along Turnpike for suspect.

07/07/17

* Approx. 0026 hrs - Cleared search area and started back to the KHP hangar at Topeka Billard Airport.

* Approx. 0032 hrs. - Wind was 030 light and variable, with approach made from the Southwest over the corn field into the KHP facility under night vision goggles. Came to a hover and taxied to the KHP concrete ramp on west side of building. I then pedal turned facing the west to line up with landing lines painted on the ramp. I looked under my goggles and observed the right painted mark directly under my right skid at which I estimate we were approx. 4 to 6 feet above. I then looked up into my goggles to set the helicopter down at which time TFO Nolte advised we needed to move forward. I tried to move forward but nothing happened at which time I felt a sudden jolt and then the noise of the tail rotor strike. I do not remember, but apparently dropped the collective which cause the helicopter to drop just as it was starting to roll. The helicopter impacted the ground at which time I shut off the fuel and battery. Before I could reach the rotor brake, TFO Nolte had already pulled it to stop the main rotors. We then departed the aircraft with minor injuries to our backs, neck and chest. KHP supervisory personnel were contacted who advised EMS and Fire to respond.

* I had no sense of moving backwards or climbing as we struck the hangar approx. 20 up. The helicopter had been operating without incident and the wind was light and variable.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

In response to this accident the landing site will be moved further away from the hangar. Future helicopter landings to the north and south would be conducted which would eliminate the aircraft from facing away from the building during takeoff and landings.

Improved, detailed landing zone markings.

NVG compliant landing pad lighting.
