Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Tail rotor destroyed, tail rotor gearbox and drive-shaft badly damaged, vertical fin badly damaged, aft end of tail boom bent.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 4:45pm while spraying a corn field along side of a timber line, I came around a corner and did not see the power line until it was very close. At this time I pulled up and banked right to attempt to avoid contact but the tail rotor struck the wire causing complete loss of tail rotor effectiveness. This caused the helicopter to go into a right hand spin, at which time I rolled the throttle to the idle position and completed an autorotation. During the autorotation the spin of the aircraft cause the tail section to impact the surrounding brush before the helicopter came to rest in an upright position on the ground.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Better scouting of the field and not trying to spray areas where power lines were present.
