Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

right gear strut displaced forward in left turn and caused right wing tip to strike ground. Prop tip hit soft dirt with not stoppage. Engine secured by pilot. Damage to right wing tip, right gear strut and area connecting at the right fuselage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed KGLD at 0730 MST and flew direct to KFLV with VFR flight following from Denver/Kansas City Center and arrival service from Kansas City Approach with clearance into the Class B airspace for arrival at KFLV. I arrived at about 1120 hrs CST.

My approach was normal with no environmental factors. I could not see the wind sock or the T on approach but saw the sock on the north hanger row which was limp as I passed over midfield.

Winds at MCI were reported at 210/06 and I set up for runway 16. Approach was at 80 knts and touchdown was smooth with no bounce. I held up the nose till passing the turn to the Military ramp and as it came down I shifted my view down the runway. As the tail started left and I corrected with rudder and believe that I may have unintentionally put pressure on the left toe brake. The aircraft veered left and as I entered the grass on the left side the left gear entered a depression and caused the aircraft to circle to the left. In the circle the right gear bent forward which caused the right tip to contact the ground. I secured the engine and fuel system and exited the aircraft without incident or injury. The engine did not stop until I pulled the mixture.

I believe I inadvertently applied toe pressure to the brake on the left rudder which I did not intend to do. There were no mechanical or environmental issues.

I believe the error is mine alone. I reported the incident to Allen Martin at the FSDO and received verbal permission to move the aircraft from the runway environment to a hanger to await inspection by FSDO.
