NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed Kfhr at approx 1150 and flew around SanJuan island on a scenic flight for my sister and her two friends upon returning to Kfhr i entered the pattern and proceeded to fly final as I was flaring to a three point landing i was struck by a gust and started a ground loop to the left. The aircraft continued to do a 180 degree circle and as i came almost to a stop the aircraft started sliding down an embankment and jammed the rt wing into the ground where the hill leveled out. Prior to the abrupt stop at the bottom the aircraft had received no damage. Runway 16 has a steep hill on the East side and is very slick according to the airport manager when it is very wet or very dry.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

No recommendation,,just that had the hill not been there the aircraft would have sustained no damage,
